## 1 Introduction

We set high standards for the way we do business. This Global Supplier Code of Conduct (the Code) sets out minimum standards of behavior and practices we require from our suppliers. We expect our suppliers to adhere to this Code, in addition to the provisions of any commercial terms agreed between Bergen Engines and the supplier.

In the event where local law, regulation or rules impose stricter requirements than this Code, suppliers must comply with those requirements.

### 1.1 Purpose

The Code specifies the minimum standards of behavior Bergen Engines requires of our suppliers. The requirements identified in the Code are based on the principles of the Bergen Engines Global Code of Conduct and are mandated through the Bergen Engines General Conditions of Purchase.

The purpose of the Code is to communicate Bergen Engines' requirements and expectations to the global supply chain; it is freely available to view and can be downloaded from <https://www.bergenengines.com/about-us/supplier-portal/>

Suppliers are required to adhere and comply with the principles set out in this document.

### 1.2 Content, scope and applicability

The Code is applicable to all suppliers and partners who supply product or services related to Bergen Engines contracts or purchase orders.

Suppliers are expected to cascade these principles to their own suppliers in order to ensure alignment across the supply chain. This may involve the establishment of supply chain management processes that integrate the requirements of this Code.

## 2. Operate safely
